# BUILDING HIGH QUALITY TIMBER DECKS, POOL DECKING, VERANDAH'S & PERGOLA'S AND CARPORTS SINCE 2003

## TIMBER & COMPOSITE DECKS

Melbourne Deck Builders, Timber Decking Now has transformed our clients desires into reality combining high quality work and materials with on time and on budget delivery of our customers Timber and Composite Decking projects.

We take the time to understand your needs and aspirations, from the overall project design & concept, to the minor details that might otherwise be overlooked.

## POOL DECKS

Need a timber deck for a new or existing pool? Getting the right kind of pool decking can make a huge difference not only to the life of the timber deck but also to how it functions in your chosen swimming pool environment.

Timber Decking Now have been building high quality Poolside Decking Projects in Melbourne and surrounding suburbs for 12 years. Every pool is unique and so are the options to make best use of the space surrounding it.

## VERANDAHS & PERGOLAS

Pergola's & Verandah Roofs are a great place to enjoy outdoor activities alone, with your family or with a group of friends. Pergola's & Verandah Roofs have a wide variety of uses including undercover fitness, an outdoor pool table, have your mates over to watch sport or entertain your family on a special occasion.

At Timber Decking Now we offer free advice on Decking material / finishes, Roofing selection for veranda's with a view to natural light and shading, Step styles & Handrail options.

## CARPORTS

Carports are a more affordable option to constructing a garage. A carport adds value to your home, can lower insurance premiums and of course, can protect your car(s) from the elements. A poorly designed carport however can detract from your home's 'street appeal'.

If you live in Melbourne, or Melbourne's outer suburbs, and need a Timber Carport, then Contact Timber Decking Now to arrange for an onsite quote, 'on the spot'.

# WHY CHOOSE TIMBER DECKING NOW FOR YOUR PROJECT?

## HISTORY

TIMBER DECKING NOW HAS OVER 12 years experience in building decks - Pergolas - Carports - Privacy screens - pool & Spa decks - repairs & alterations.

We back our claims with hundreds of photos of past projects in Melbourne's Eastern Suburbs.

## HONESTY

TIMBER DECKING NOW posts only photos of REAL projects on our website. We DO NOT post photos showing "snow capped mountains" or a "forrest of Northern Hemisphere Fir trees" making up the background of featured decking projects which OTHERS post and CLAIM as THEIR work!

TIMBER DECKING NOW considers this practice to be MISLEADING & DECEPTIVE.

We post on our web site ONLY OUR PROJECTS, not "million dollar" "foreigners" from North America or Europe which knowingly DECEIVE & MISLEAD.

## TRANSPARENCY

YOU GET WHAT YOU PAY FOR is NOT ALWAYS TRUE!

When ordering a deck, pergola or carport, you cannot see the final product in advance, so you

ACCEPT in ADVANCE what you are being told by the builder.

What you are getting may be written into the quote you receive, but what are you REALLY getting at the end of the day? Here are a few examples:

- |                           |  |
|---------------------------|--|
| (A) Treated pine posts!   | <i>OK, What type and specification is written on the quote?</i>      |
| (B) Merbau decking! Cool! | <i>What type and grade of Merbau?</i>                                |
| (C) Subfloor              | <i>What sizes and grades are proposed?</i>                           |
| (D) Polycarbonate roofing | <i>Which brand, which profile and which model.</i>                   |
| (E) Composite Decking     | <i>Which brand, how long is the warranty, brand guarantee terms?</i> |

So you have several quotes in hand, all for the same project and at varying prices! Which one is right for you?

At TIMBER DECKING NOW we clearly specify the product name, it's specification or common product code, size if applicable, and why we are using it! We DO NOT build CHEAP to win your project on cost.

## VALUE FOR MONEY

### PRODUCT, PRICE & PERFORMANCE

If it's clearly stated in the quote, it's what you get. If is not stated, you get what your given, AND WHAT YOUR GIVEN will be "the cheapest available product" because it was NOT SPECIFIED in the quote and YOU DID NOT ASK!
